✓ # Bagging ensemble tech.

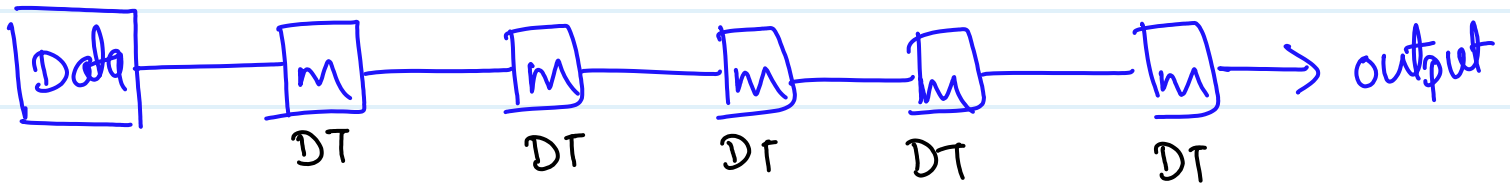

parallel training tech.

homogenous

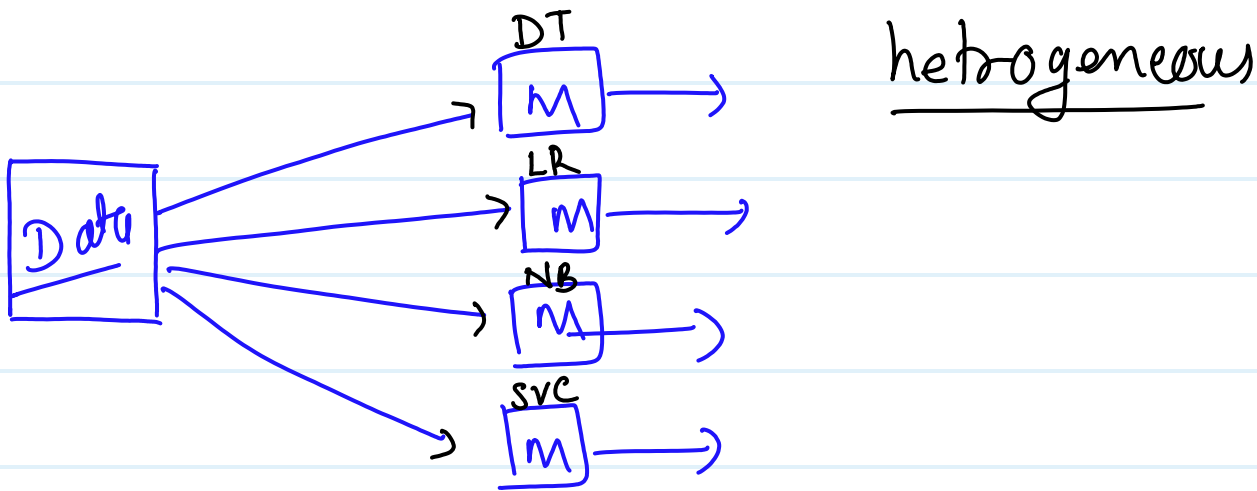

Boosting Ensemble Tech.

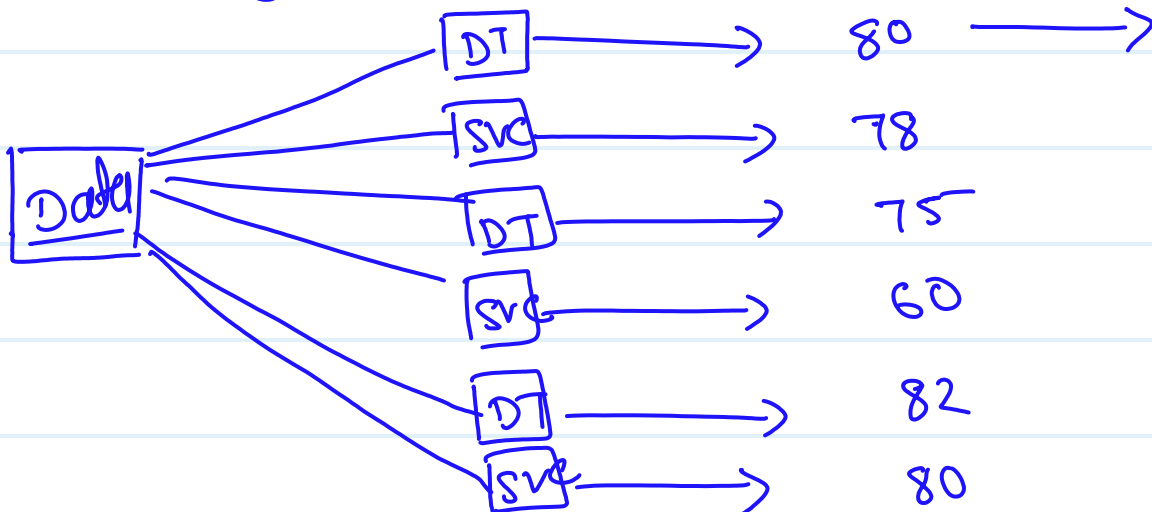

This is sequential training.

stacking ensemble technique.

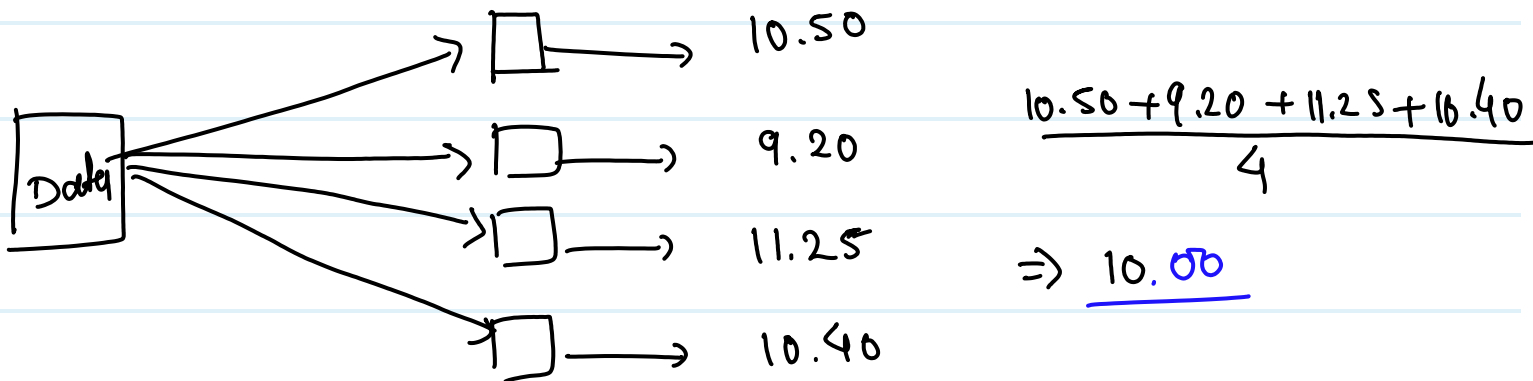

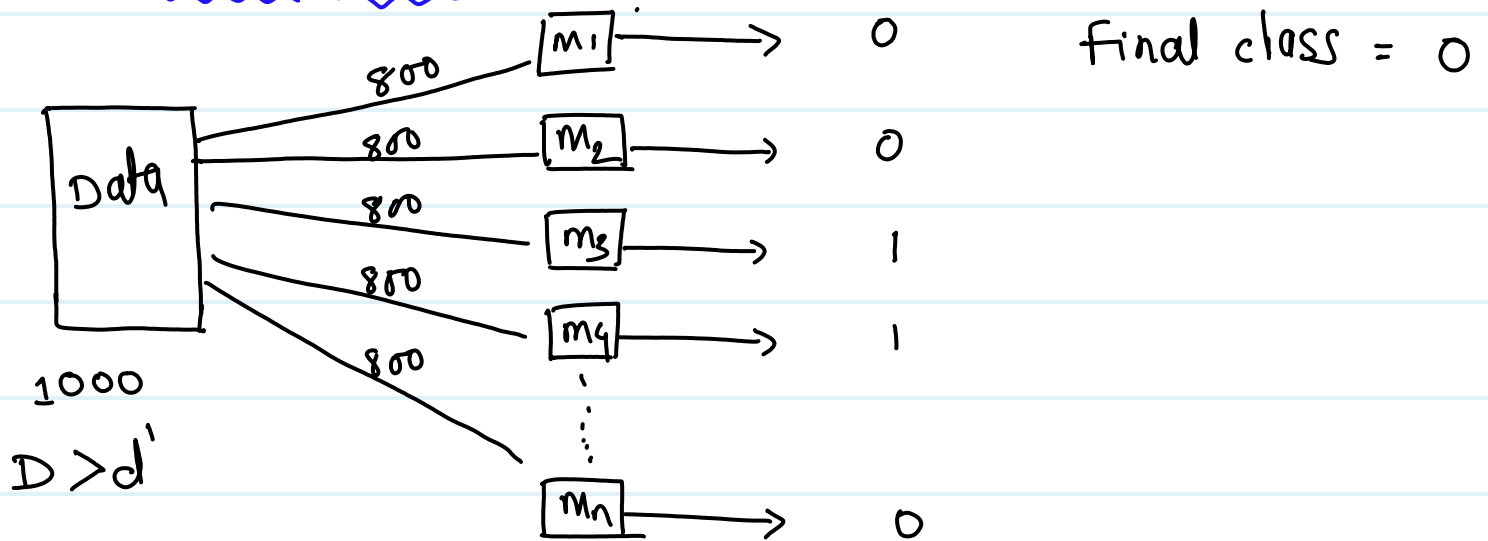

① voting ensemble tech.

Bagging tech.

① Random forest →

Pros

- I) prevent overfitting
- II) Bias reduce
- III) Prediction is depends on multiple model.
- IV) huge data
- V) faster training

Cons

- I) It required high computation
- II) it should maintain tuning carefully
